Working in partnership to provide bespoke technology and processes for your business and customers, to share ideas and collaborate effectively together.

Workspace Design

Interactive Touch Screens

Huddle & Collaboration Spaces

Room Booking Systems

Audio, Web & Video Conferencing

Workflow Consultancy

Collaboration & File Sharing

Office Systems Integration

Unified Communications

40%

of meetings happen when they were originally booked, and on average, are 6 minutes late to start.

VISUAL SOLUTIONS

Employee expectations for meeting room technology is rapidly advancing. Today's workforce expects to walk into any boardroom, huddle space or other meeting area and be able to present & interact with information as easily & instinctively as they do with their smartphones.

At Aura, we listen, advise & collaborate to provide meeting room solutions bespoke to your company's needs. We ensure that all technology in your meeting rooms are optimised effectively so that employees can work, present and collaborate seamlessly straight away.

KEY BENEFITS

Visual solutions can seamlessly integrate with print infrastructure as well as document management systems

Documents and images can be imported directly for display on interactive screens, enabling edits or collaboration across teams

Multi-faceted wireless communication and collaboration tools integrate across all locations and smartphones

ROOM AND DESK BOOKING SYSTEMS

Employees are continuously frustrated with inefficient, disorganised and inadequate meeting room booking processes which waste time and hinder productivity.

At Aura, our booking systems ensure that users find workspaces to suit their needs within seconds, creating a more agile work environment and efficient use of time.

KEY BENEFITS

Seamlessly managed rooms, desks, diaries, visitors, hospitality, resources and video optimisation

Full integration with audio visual offerings to ensure that minimal time is lost traveling and accessing content

Highly effective space utilisation will free up productivity and enable employees to self-manage their workspace and environment
