Workflow Assessment

Managed Print Audit

Cost Analysis & Savings

Volume Analysis

Improved Device & Document Security

GDPR Compliance

Reduced Environmental Impact

Paper/Document Digitisation

Improved Reporting

Increased Staff Efficiency

68%

of organisations feel business use of paper is unacceptable in the future

WORKFLOW SOLUTIONS

By streamlining workflows and improving processes for paper-based documents, businesses can reduce costs and enable employees to focus on their important tasks.

At Aura, we tailor our powerful scanning, digitization and automation tools to streamline workflow across your whole organisation. We do this by transforming how you store, access and action your data - simultaneously increasing both security and business agility. Users can access information and accomplish tasks from any device, while document-related tasks are efficiently routed to the right end device or file location.

KEY BENEFITS

Digitization of processes to free up employee time

Accurate, accountable and traceable document processes, ideal for GDPR compliance

Secure, cloud-based systems available with full failover provisions to protect data

MANAGED PRINT SERVICES

Paper-based documents are still heavily utilised by employees within businesses. However, modern organisations are looking to reduce paper consumption and the associated costs. In order to achieve these goals without hindering employees' workflow, businesses require comprehensive MPS solutions.

At Aura, our managed print services will optimise and proactively manage every aspect of your print environment; improving your data security and enabling users to accomplish tasks faster and more effectively.

From embedding software and maintaining your devices & technologies, through to training your staff, providing service support and remotely monitoring your consumables and usage, we take care of everything.

KEY BENEFITS

Reduced paper consumption as a result of increased awareness on print volumes

Reduced costs associated with print, as departments can be charged-back usage against their P&L

Increase security of information in line with GDPR compliance with the introduction of pull printing solutions

Full integration with workflow tools to aid digitisation and streamline workflow
